

CO₂ Emissions Globally

From 1990 - 2020

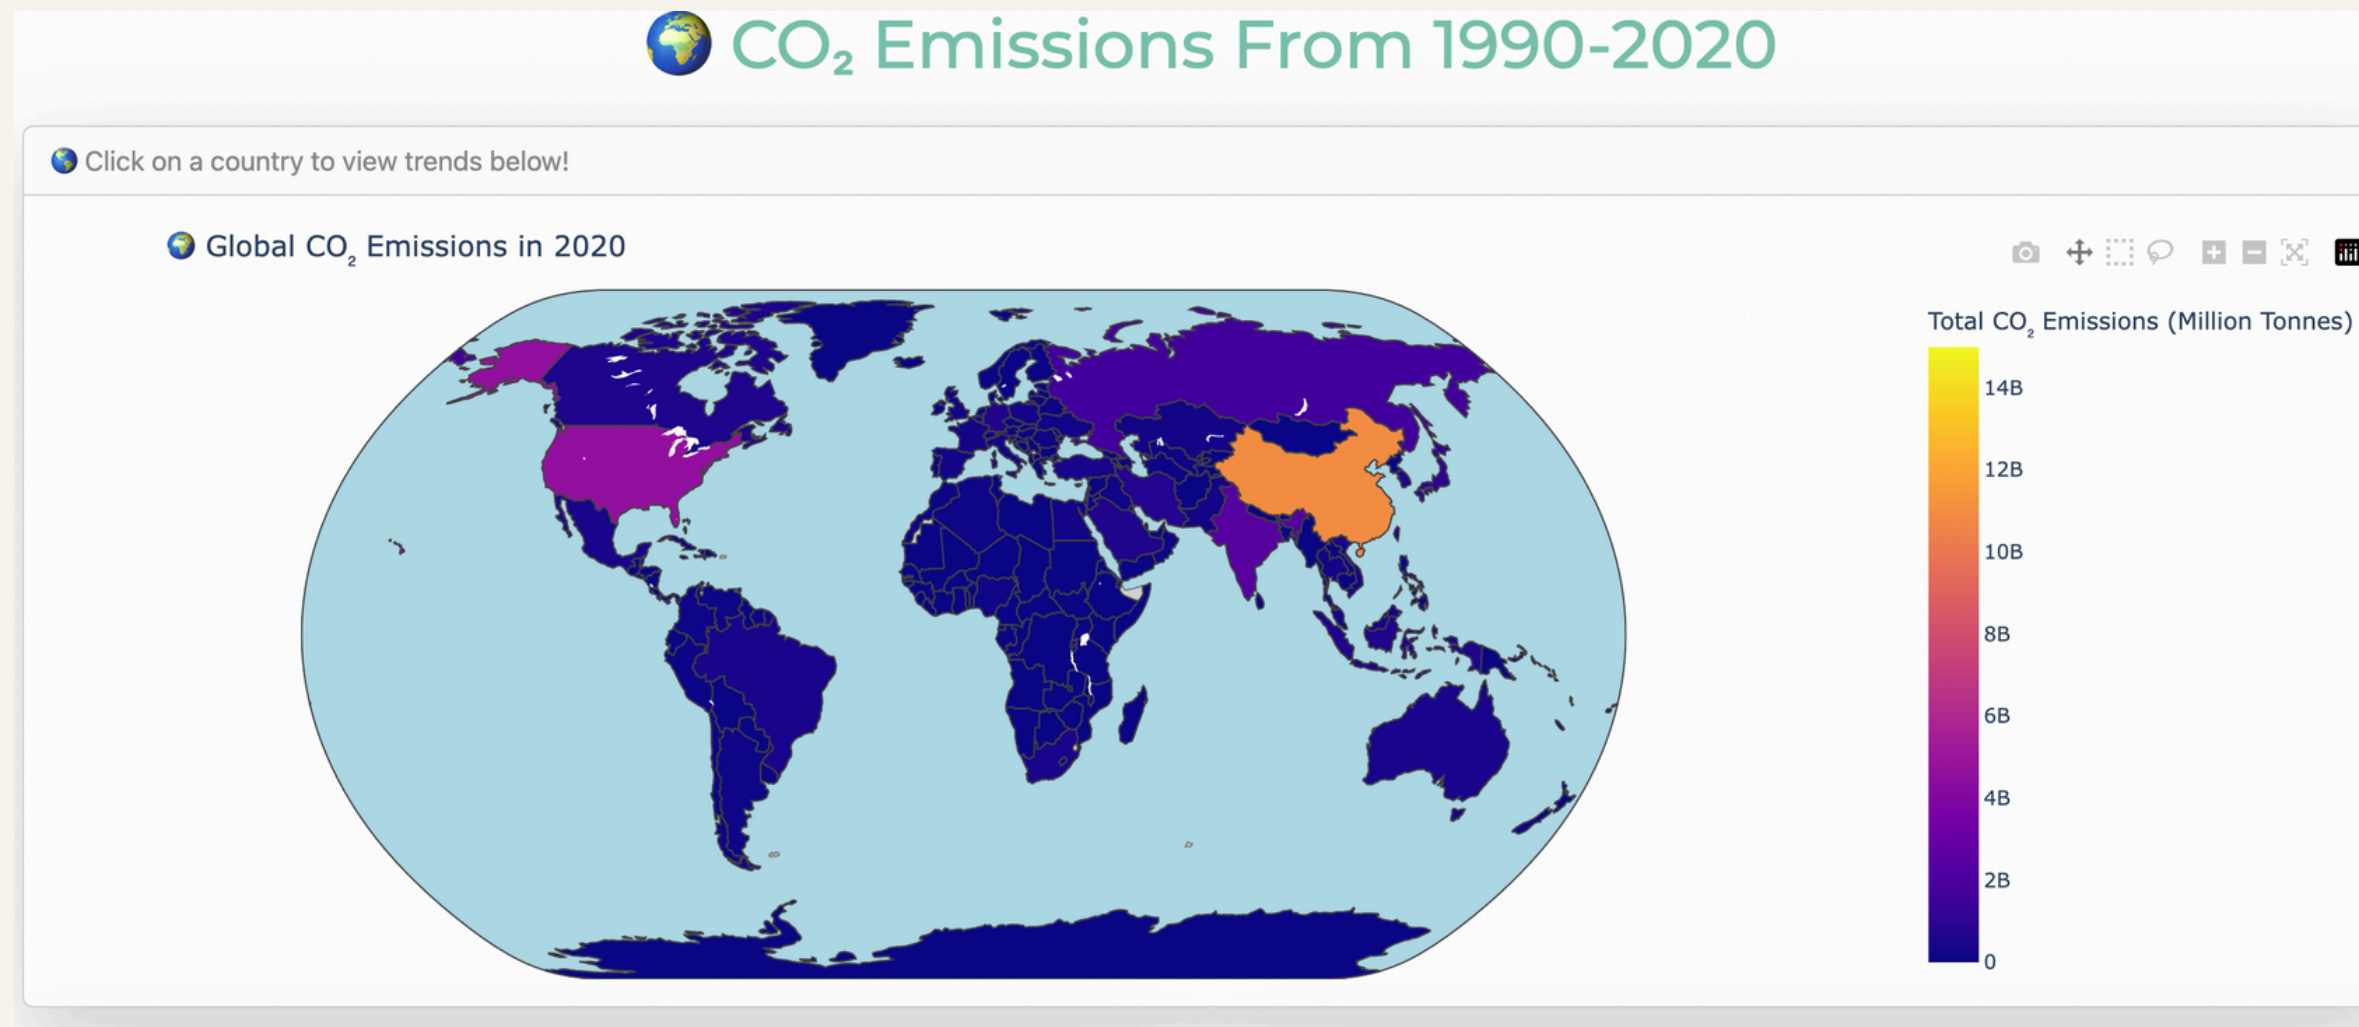

What is the problem?

- CO₂ emissions are a major driver of climate change
- The first step to change is understanding

What is my project?

- Exploring global CO₂ emissions from 1990-2020 by country and sector

Why does it matter?

- Which countries are the biggest emitters?
- How have emissions changed over time?
- What industries are driving pollution?
